

To the House of Representatives

The petition of Dr Muriel Newman and others respectfully request that **New Zealand school children be protected from political indoctrination** by inserting into the Education Act provisions similar those found in clause 406 of the British Education Act which forbids “*the promotion of partisan political views in the teaching of any subject in the school*” and clause 407 which requires that if political matters are raised, children “*are offered a balanced presentation of opposing views*”.
